ALTIUS VA // CHAS // CONSTRUCTIONLINE // SAFE CONTRACTOR

Horizontal Safety Lines

Applications //

Safe working solution at height for building maintenance, inspections and facade access works on all types of construction.

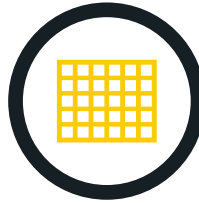

Features //

Horizontal safety lines (Soter® System) allow versatility of work at height. The Soter® system which is completely made from stainless steel, and is the only system that protects both the roof and the person in the event of a fall.

Tested //

12 months

GRP Walkways

Applications //

Accessing roofs, other fixtures and suitable for walkways.

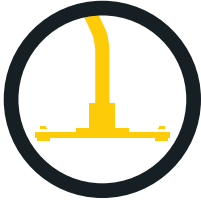

Features //

A lightweight glass reinforced plastic (GRP) with a reliable anti-slip solution for under foot. Corrosion and fire resistant, no maintenance.

Inspected //

Periodically

Edge Protection Guardrail

Applications // Freestanding Guardrail and Top-fix Guardrail/edge protection for accessing roofs and protecting from a fall.

Features // Permanent or temporary Freestanding Guardrail, quick to install and non-penetrative to the roof membrane. Options of curved or straight design, with a counterbalance base. Permanent Top-Fix Guardrail ideal for parapet roofs or handrails.

Inspected //

12 months

Eyebolts

Applications // Eyebolts for 'Fall Arrest/Fall Restraint' working e.g. window cleaners accessing the window from the inside. Eyebolts for 'Rope Access/Work Positioning' are used for abseiling.

Features // In the event of a fall from height, 'Fall Arrest/Fall Restraint' eyebolts would save the worker on one occasion. In place for works to be carried out using ropes attached to these eyebolts enabling the worker to carry out regular work using two points of contact.

Tested //

'Fall Arrest/Fall Restraint'

12 months

'Rope Access/Work Positioning'

6 months
